

# THRIVE

60 nature-based solutions to improve people's lives

## THRIVE – a new mobile application to reach across Africa

Thrive is a guide on how to achieve the most with limited resources.

It is a step-by-step guide on how to implement nature-based solutions for the protection and sustainable use of natural assets. These solutions help improve people's lives in cities across sub-Saharan Africa. The app houses solutions that can be achieved by any individual or community, at the local scale.

The solutions are divided into six themes: **restoring soil, saving water, rehabilitating green spaces, producing food gardens, sustainable cooking and energy, and preventing disease and disaster.**

The application is developed for Android and can be downloaded for free via Google Play. It is accompanied by a dedicated website and introductory video.

Watch the video and download the app: [www.thriveapp.co.za](http://www.thriveapp.co.za)

Developed by ICLEI's Cities Biodiversity Center in collaboration with Aurecon and with contributions from SwedBio. Funded by the Swedish International Development Cooperation Agency (Sida) through SwedBio at Stockholm Resilience Centre.
